I can do it since I'm in for other changes too.

Regarding this statement: "proposed (but not yet final) changes to FAR package" – what does that mean?

See edits in green below. Or let me know and I can go put them directly in the agenda if nobody else has it open for editing. Thanks.

Ok. Do you have an update for OIAI for the MAMPD Agenda:

- Reclassification of Major MACT Sources to Area Sources (OIAI) (Part 63 Subpart A) (SAN: 4908, Tier 2, Sara Ayres). OAQPS agreed to request from OECA/OP for up-tier. Agreed to waiver of Analytic Blueprint 9/25/18.

Deliberative Process / Ex. 5

OECA/OAR AAs to the RA's, sent with OECA's final edits to OAQPS for final review 11/19/18.

I don't think there are major updates or decision points this week. We're still waiting to hear from 2 of the 10 parent companies, but they have until next week to contact us. You were on the call last week where OAQPS agreed that we could begin drafting letters of completeness, but that also may agree to an extension until they get their permit (if warranted). I sent a first draft to you and Rob for comment last week, but obviously won't hear back from Rob at least until next week. So, I think it would probably be better to tee up for the 28th, at which point we should know more about where we stand on everything.

Hey Sara,
Martha asked if we wanted/needed to provide an update on the issue for the MAMPD Weekly. LMK, if so, can you pls put some bullets in the MAMPD Agenda? Since you are out at noon on Wednesday, I may need you to walk me thru it to refresh me so I can act somewhat intelligent about the topic.

Subject: Follow-up on Compliance Assistance for Brick Industry Compliance Extensions

When: Wednesday, November 14, 2018 10:00 AM-11:00 AM (UTC-06:00) Central Time (US & Canada).

Where: Conference #:202-991-0477, Code: 6990430#

All,

Thanks for a good call today. To summarize for those not able to attend:

- We went over the color-coded summary spreadsheet (attached) that includes the responses we've received to date (8/10 companies and 16/18 facilities).
- We decided that for the 5 "green" facilities (those that have submitted permits at least 6 months ago), our next step should be to reach out to the Regions to have them contact the states and find out expected timing for the permits – some facilities may need no extension, others very short ones.
- Sara will go through the 7 "yellow" facilities (those who have submitted permits in the last month, or expect to submit "soon" based on stack test results) to determine a case-by-case recommendation on who should follow up and when. These facilities will likely need extensions, but may not need a full year.
- OGC thinks it could be possible to issue a compliance extension "until permit received" rather than for a specific number of months, if that makes more sense for facilities that have done everything and are just waiting on their state. Another option would be to have states issue extensions where they are the ones determining the schedule.
- Need a subsequent meeting to go over the 3 "purple" and 1 "orange" facilities that may need to provide more information before we can determine a timeframe for response.

To that end, it was impossible to find a time with everyone available, but let me know if this time works for most the follow up call, and if anyone has questions or needs anything else. Thanks.
